Informatie: (1/2)	The Partnership for Biodiversity Accounting Financials (PBAF) is a partnership of financial institutions that work together to explore the opportunities and challenges surrounding the assessment and disclosure of the impact on biodiversity associated with their loans and investments.	
	Through discussions, the exchange of experiences and case studies, the PBAF partners cooperate in the development of a set of harmonized principles underlying biodiversity impact assessment.	
	Such principles are not reserved to one specific impact assessment methodology and may offer a valuable starting point for both qualitative and quantitative biodiversity impact assessments or biodiversity ‘footprints’. By means of these principles, PBAF wants to contribute to the development of a harmonised biodiversity accounting approach in the financial sector. [bron]
